Introduction

Downloading music to your personal computer does not have to be something you hide from the neighbors for fear of winding up in jail. There are thousands of websites that have music available for download. Some are pay sites and many are completely free.

As a musician you want to have some of your music circulated on the web for people to hear. As a music listener you want to listen to music and enjoy what you hear.

Well the links listed below by category are just a few hundred of the available places where music may be downloaded legally,

This listing is by now way complete. But visit the [Music Media Entertainment Group](#) website for additional sources of music available for download.
